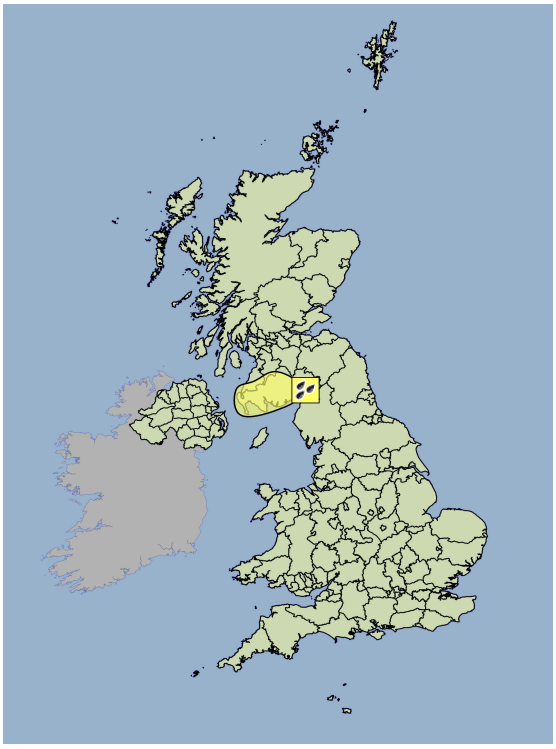
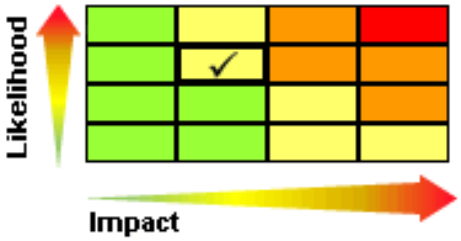
National Severe Weather Warning Service





Chief Forecasters Assessment
A frontal system containing mild and moist Atlantic air will move east across the UK later Monday before clearing early on Tuesday. This rain is likely to be heaviest and most persistent over hills, with scope for 40 mm, locally 60 mm, over the most exposed sites.

This alert is an update of a previous issue.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **20:00 on Mon, 29th Feb 2016** until **09:00 on Tue, 01st Mar 2016**

An area of occasionally heavy rain, preceded by snow above around 300 metres, will push across western Scotland from mid-evening, which eventually clears to showers towards dawn Tuesday morning. In the southwest this may bring some disruption, particularly across the Galloway hills.

Please be aware of the potential for localised flooding and difficult travelling conditions.
